

## TO WORK DUMPS OF OLD PLANTS

Many Thousand Tons of Ore Can Be Made Profitable North of Globe.

Globe, Ariz., May 3.—The famous Richmond Basin section, nine miles north of Globe, where silver nuggets were picked from the ground by the wagonload 40 years ago, is having a revival. The old Mack Morris, Richmond and La Plata mines are included in a group under development by the Globe Mining company, of which W. H. Swenson is superintendent. The old mine dumps have been sampled carefully and found to contain many thousands of tons of ore that can be worked at a profit under modern conditions. In the Richmond good ore has been cut in two places at 50 feet of depth. A 10-stamp mill is being built and will be in operation soon. Commencement is being made of the well known Harvey and Porphyry groups of the Miami section, under the name of the latter corporation. Each share of Porphyry is to be exchanged for 1 1/2 shares of the new company. Harvey is to be exchanged for 1 1/2 shares for 1 of the new. The Porphyry lately acquired the well known Philadelphia property above Miami and a part of the old Mack Morris group. It has been concluded that a merger is the logical thing.

## COAHUILA COAL MINES ARE PRODUCING AGAIN

The coal mines of the state of Coahuila, Mexico, recently resumed operations and 40,000 tons a month are being turned out, according to reports. This is about half the normal capacity. Only about 15,000 tons of coke are being produced. This is about one-third the normal output.

## TO BUILD \$100,000 PLANT AT MINERAL HILL

It is reported that the Mineral Hill property, U. A. Pittsboro, manager, 25 miles southeast from Tucson, Ariz., is to have a \$100,000 concentrator built. This property has been in course of development for a long while. It is controlled by Pittsboro capitalists.

## ENGAGE NEW MANAGER.

M. L. Gaylord of the new Coahuila Coal company, an El Paso concern, stated this week that the company had engaged as manager A. G. Bennett, a coal mine manager of many years' experience in both hard and soft coal in the east and also in New Mexico. Mr. Bennett is at the mine at Coahuila, New Mexico, preparing for the commencement of actual work at once. Mr. Gaylord is of the opinion that manager Bennett will begin getting out coal for the El Paso market by June 1.

## GOLD MINE AT CLIFTON.

Clifton, Ariz., May 3.—The Ash Peak company, operating mine here west of Clifton, is preparing to build a 100-ton mill and cyanide plant. The management of the mine says the ore is in such a rich state that it will last for 50 years. The ore is almost pure quartz, carrying little metal save gold, and thus is ideal for cyaniding. In this respect resembling the Outman district ore. The larger of two veins has a width of nine feet and has been opened at depth for a length of 600 feet.

Curran & Co. buy Liberty Bonds.—A

## Quicksilver In Texas May Prove Great Industry

Expert Tells Of History and Possibilities Of Brewster District.

"Quicksilver mining in Brewster county, Texas, has a great future. There has been produced there more than \$2,500,000 worth of that metal from 1898 up to the end of 1918 and of this amount \$2,500,000 worth was produced in the past three years. The exact figures of Texas production from the beginning of operations in 1898 to the end of 1918 were \$1,575,000, value \$5,478,677; the same rank second to California, which has a grand total since 1859 of 2,237,652 flasks, value \$10,672,097. There will be developed in the Brewster, Texas district a quiescent mine which will carry millions in quicksilver values. I have been studying the Brewster district for two months," said E. A. Walker, a former quicksilver mine operator of California Friday.

"Operations in Brewster county began in 1912 and the first year 1000 flasks were produced. The district has not been scratched. J. A. Cullen, W. H. Phillips, J. P. Clark and other eminent men, who have investigated the district, for years have predicted a quiescent industry in that section."

"The Texas ore is of a massive lower crystalline limestone and upper crystalline limestone and shale. Eagle Ford. These are closely associated with small bodies of intrusive rocks of various kinds. Some of the deposits in Texas. This line is of advantage in smelting. Tequilquarite and crystalline of mercury, known as 'thore' quicksilver, have been found in the shallow workings in the Terlingua district.

"Quicksilver forms in cracks, seams and fissures of the same of fracture zone of flowage, belt of weathering and of concentration. The richness of minerals is to a great extent dependent upon the size of the crystals, favorably for deposition and consequently upon the compactness of the fissure filling. Hence, rich ore bodies are found principally in those parts where the fissure filling has been crushed and distorted. The characteristics of quicksilver are so different from those of all other metals that the general of quicksilver deposits is an intricate problem. The deposits are frequently irregular and, with all other peculiarities of the metal and deposits of its ore, makes successful mining of the metal require even more skill than perhaps any other metal. The process of reduction is exceedingly simple, but in practice it is by no means easy to control.

The Brewster district has an area of 5000 acres. The elevation varies from 2417 feet to 7517 feet. The ore is of higher grade than those of California. The principal producers are the Mariposa, Chisum, Big Bend and Ellis mines. The three first mentioned have been in active operation since the early stages of production of the district and have turned out practically all of the quicksilver of the country."

## BUYS OLD CLAIMS.

S. G. Smith of the City of Montreal, Arizona, district, has taken over, under six months option, seven gold claims in Sierra county, N. M., from Bernardino Caballero who had been working them in a trade way for years. Metcalf and Mowbray people are interested with Mr. Smith in the option.

## PATAGONIA IS BUSY DISTRICT

Shows Greatest Activity of Recent Years With Very Rich Silver Strikes.

Patagonia, Ariz., May 3.—Not for years has this section known such activity in mining as has come lately, even though handicapped by the slack demand for its copper ores. But there has been a corresponding turn toward silver, and development along that line is showing rich returns. James Layman, a successful Jerome mining man, and W. E. Moore have organized "The Layman-Syndrome" to take over the Pierce-Gardner and Blue Nose mines. Practically all the capital comes from Jerome. Pierce-Gardner since last December has shipped 27 carloads of silver-lead sulphide that has returned for \$100 to \$150 a car.

Hardsell is placing a new belt and compressor equipment. Morning Glory is building a modern camp and will start operations at once on a large scale. Twentieth Century, in the Santa Rita section, has three veins of pure ore, from one of them coming silver samples that assay 100 ounces to the ton.

Golden Rose, near the World's Fair, a property owned by Los Angeles interests represented by F. B. Hathaway, is being developed under the direction of August Brodies.

## MANY MESABA RANGE IRON MINES ARE CLOSING DOWN

Chisholm, Minn., May 3.—Many of the small independent iron mines on the Mesaba range have closed or are closing and the larger ones are reducing their working forces 40 to 50 percent. It was learned today, because of unsettled conditions in the steel market, attributed by some to the dispute between the federal boards over steel prices.

## PLAN CYANIDE PLANT.

The Stargis Syndicate is figuring on a cyanide plant for the Stargis mine near Morenci, Ariz. M. J. Harmon, of this concern has advised with J. M. Calloway, one of the consulting metallurgical engineers of the Arizona Copper company regarding this plant. The latter, with John H. Wattman, was lately in Morenci making mill tests at the No. 5 concentrator of the Arizona Copper company. The headquarters of Messrs. Calloway and Wattman are in Salt Lake City.

## Butler Fat Record To Be Gaily Celebrated

Rosen, Ore., May 3.—An Oregon Jersey jubilee in celebration of the world's record butter fat production which has been made by Oregon cows will be held in this state during the latter part of May, according to a decision reached at a recent meeting of the Oregon Jersey club.

This jubilee probably will extend over four or five days and may be held between May 15 and 25. Following a one day's session in Portland, the plan is to spend the remainder of the session in an automobile trip inspecting the herds of blooded Jersey cattle throughout the Willamette valley.

## Sentence Sermons by El Paso Ministers

THE test of any civilization, nation, religion or individual, is its inherent vitality. The weakness of any "revival" movement of whatever sort lies in its admission that the revived institution needs to be braced up by some external agent. When you have to take a patent medicine to restore your "lost vitality," it proves that you lack the inner health which automatically supplies vitality. This is true all around. It is the duty, therefore, of a civilization, nation, religion or person to maintain within itself the true power of renewal which renders unnecessary any "revival" by patent process. The marring of this inner vitality is the double power to grow and to create. That which grows and that which constantly creates, needs no stimulant or "revival"—Rev. Dwight J. Bradley, First Congregational church.

It appears certain that a great revival is taking place. Not so much in ecstatic rhapsodies as in a more practical application of the teachings of Jesus. It will permeate every condition of human life, affect the private, the social, the commercial and the political life, not of this nation only but of all the world. To this end the contemporary campaign of the Methodist church will contribute very largely, and the raising of \$100,000,000 is for the purpose of promoting "the coming of the kingdom" when righteousness, joy and peace in their most comprehensive terms shall reign the world over.—Rev. W. S. Huggest, Highland Park Methodist church.

The crying need of the day is conviction in all the relations of life but especially in the spiritual relations. Conviction has been defined as that which a man holds. Some one else has defined conviction as that which holds a man. We are not only required to believe something but to be courageous and loyal in maintaining what we believe. And along doctrinal lines we should always subject our beliefs to the acid test of God's Word and be glad to subject them to this supreme test. To say that it doesn't matter what a man believes just so he is sincere flies both in the face of reason and the Bible. Conscience is a true moral guide only when following the teaching of inspiration. "Examine yourselves whether you be in the faith."—Rev. J. F. Williams, First Baptist church.

## SCRIPTURE.

with the Lord our God, to walk in his statutes, and to keep his commandments, as at this day.

## ISSUE REGULATIONS FOR NEW CAPITAL STOCK TAX

Washington, D. C., May 3.—Returns filed by corporations for the taxable period July 1, 1918, to June 30, 1919, under provisions of the law of 1918, will be used by the bureau of internal revenue in assessing the new capital stock tax, for which regulations have been issued.

All corporations, joint stock companies and associations, foreign and domestic, engaged in business in this country, are subject to the law unless specifically exempted. All corporations are held to be engaged in business and liable to the tax unless positive proof is submitted showing exemption or nonliability.

Special taxes of which this is one, become due on the first day of July in each year or on commencing business. The tax is payable in advance. The tax does not apply to any corporation which was not engaged in business during any part of the fiscal year preceding the year for which the tax is due.

Why purchase a new cheap car when you can buy a good used car with satisfaction and all conveniences for as much as a new one? You can quickly tell for a year hence? Watch for El Paso Overland Co's Victory used car sale starting May 15th-Ad.

## Among The Gushers

### SILVER-BURK

Is proud of her neighbors—

Marine—Helen Elizabeth—Horne  
And Van Cleve

But when BIGGER GUSHERS came in SILVER-BURK wanted to be near them, too. Burk-Waggoner—Golden Cycle—Gilliland No. 17—Humble No. 2—ALL FOUR came in during TWENTY-FOUR hours—making a combined production of 13,600 barrels per day.

## And Silver-Burk Bought Here

Silver-Burk was CONFIDENT that the wonderful lease in Block 103 Van Cleve Farmlands—would pay BIG DIVIDENDS to their investors—they are still CONFIDENT. But these men are DETERMINED that SILVER-BURK shall pay the biggest dividends of any company in the field and when the GUSHERS northwest and north of the Townsite came in SILVER-BURK'S representative in the field IMMEDIATELY secured leases in Block 74 adjoining the Burk-Waggoner and Golden Cycle blocks.

If you want Silver-Burk stock you must place your order immediately. There's a few shares left—BUT VERY FEW—to be safe you'd better wire your reservation.

## Fort Worth Papers Say

The well of the Burk-Waggoner Oil Company on the Boxer lease, three and a half miles northwest of the town of Burkburnett, is flowing steadily, according to reliable field reports Monday, and making between 1,000 and 1,500 barrels in the twenty-four hour period. The well is only seven feet in the sand and drilling is continuing, the flow increasing as the drill goes deeper.

The scramble for Burk-Waggoner stock featured the Monday morning sessions at the oil exchanges, though none of the stock changed hands. Bids ran from \$100 to \$125 per share, while very little of the stock was offered and none of this at less than \$1,200. There were few who held stocks that showed any unusual strength and the trading was limited.—Star-Telegram, April 21.

Orders to receive from Burkburnett that the Burk-Waggoner was a good one and caused much excitement. This stock sold during the day as high as \$1,200, and all stocks in the same vicinity advanced from 200 to 300 points.—Record, April 22.

This well Monday was flowing at the rate of 3000 barrels a day, at present the best producer in the field. The well is in Block 84, 2 x 2 x 2 blocks at present most in the daylight are 72, 73, 74, 83, 84.—Star-Telegram, April 22.

## Do You Realize— That Ossenbeck

is the best buy on the market today? Do you realize that there is not a company with a location as near the big wells in Burkburnett that you can get in at par as the Ossenbeck? Do you realize that the capital stock is only \$65,000—only 650 shares? Do you realize what a three thousand barrel well such as they are getting in this vicinity would mean to you if you owned a couple shares of this stock? Do you realize that practical oil men are putting in their every effort to make this company a winner for the stockholders?

Do you realize that fortunes are being made every day in the pool west and northwest of Burkburnett by companies that have the right location and the proper management.

Do you realize that if you do not take advantage of this opportunity soon you will be too late as it will be sold out?

Do you realize that never in the history of the Oil business has the man with a little money the chance to make a killing such as the Burkburnett field, especially the west side, offers?

Do you realize that the failures in the Oil Business on an average are no larger than any other business?

Jam-Up to  
—Burk-Waggoner

## First Buy Victory Bonds Twin Gusher GOING OVER THE TOP

Investors have discovered the CONSERVATIVE POLICY of the TWIN GUSHER. This is evidenced by applications for stock reservations from all points, even New York City. TWIN GUSHER has not indulged in RED PAINT or extravagant statements. THE TRUTH is sufficient. THESE LEADING FEATURES such as:

ACREAGE IN PROVEN TERRITORY.  
LARGE ACREAGE AND IN DIFFERENT FIELDS.  
SUFFICIENT CAPITALIZATION TO PROPERLY DEVELOP.  
EXPERIENCED BUSINESS AND OIL MEN TRUSTEES AND OFFICERS.

## Make Twin Gusher Attractive Investment

QUICK RESULTS is also another leading feature. We are not JUST PROMISING to drill SOMETIME, we are GOING TO DRILL AT ONCE. OUR field man, Mr. Cummings, is now on the ground to arrange final details of drilling contract. We expect word any moment contract has been signed to drill on our Burkburnett 10 acres.

## Comanche Prospects Bright

Reliable information has been received that the "LUCKY," our neighbor on the south, is drilling in a gaseous formation at 3,370 feet. This well is expected in any day, any hour. If it comes in a gusher our 200 acres will be worth more than twice our outstanding stock. Five other wells are drilling near us, all of them NEAR THE SAND. Any one of these will give us the same results.

## NOW IS THE TIME TO BUY TWIN GUSHER

Get your application in BEFORE some of your neighbors bring in a big well. Before all of the \$50,000 par value stock is taken. You HAVEN'T MUCH TIME. We have had to increase our office force to handle subscriptions coming in. SO IF YOU are thinking TWIN GUSHER, think FAST.

TWIN GUSHER has the THREE necessary elements for success: LOCATION, ACREAGE, MANAGEMENT. These are FACTS, not mere assertions. If investing in OIL choose THAT KIND of a Company. TO BE SURE you are doing this choose the
